

### Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claims 1 to 41 (Currently Cancelled)

42. (Original) A spoonable or drinkable food product comprising a transparent or translucent container that contains on-demand dispensed portions of at least two visually distinct food components which are refrigerated and non-thawed, wherein the components are viewable through the container.

43. (Currently Amended) Food product according to claim 42, wherein said portions are single serve portions formed of successive layers of the food components without apparent bleeding of the two layers together at least two minutes, ~~preferably at least 5 minutes~~ after dispensing.

44. (Currently Amended) Food product according to claim 43, wherein one of the food components is an acidified dairy component, a spoonable cheese, or sour cream.

45. (Original) Food product according to claim 43, wherein one of the components is a fruit based component.

46. (Original) Food product according to claim 42, wherein said portions are single serve portions formed of a swirled visual effect of the at least two components

47. (Original) Food product according to claim 42 wherein the components are arranged concentrically in the container.

48. (Original) Food product according to claim 47 wherein an innermost component is a white acidified dairy component and an outermost component is a fruit sauce.

49. (Currently Amended) Food product according to claim 42, ~~wherein one of the components is a culinary component~~ further comprising inclusions.
50. (Currently Amended) Food product according to claim 42, wherein the portion of food product is a portion suitable for serving a group of individuals.
51. (New) A food product according to claim 42, wherein the at least two or more food components have characteristics that are different from an adjacent layer.
52. (New) A food product according to claim 42, wherein the at least two food components form diagonally opposing quadrants in the container.
53. (New) A food product according to claim 42, wherein the at least two food components each form a hemisphere in the container.
54. (New) A spoonable or drinkable food product comprising on-demand dispensed portions of at least two visually distinct food components, wherein the food product has phase stability upon serving to an individual without requiring substantial amounts of stabilizers.
55. (New) The spoonable or drinkable food product of claim 54, wherein the food components are dispensed in a transparent or translucent container, and further wherein the food components are viewable through the container.
56. (New) The food product according to claim 54, wherein the portions are single serve portions formed of successive layers of the food components without apparent bleeding of the two layers together at least two minutes, after dispensing.
57. (New) The food product according to claim 54, wherein one of the food components is an acidified dairy component, a spoonable cheese, or sour cream.
58. (New) The food product according to claim 54, wherein one of the components is a fruit based component.

59. (New) The food product according to claim 54, wherein said portions are single serve portions formed of a swirled visual effect of the at least two components
60. (New) The food product according to claim 54 wherein the components are arranged concentrically in the container.
61. (New) The food product according to claim 60 wherein an innermost component is a white acidified dairy component and an outermost component is a fruit sauce.
62. (New) The food product according to claim 54, further comprising inclusions.
63. (New) The food product according to claim 54, wherein the at least two or more food components have characteristics that are different from an adjacent layer.
64. (New) The food product according to claim 56, wherein the at least two food components each form a hemisphere.
